

PHOTO KEEPER

By Sasha Farina

HEYDAY
COLLECTION

Hey everyone, I always have extra printed photos on hand, what about you? I print at home and I like to print a couple pages at a time. I decided to make a 'keeper' for my printed photos. I love my picture keeper with it's divided sections for the girls and family and misc photos and hope you'll try to make one (and customize it) for yourself too! Have fun!

HEYDAY
COLLECTION

01

STEP 01

Gather your supplies. I have three pieces of chipboard, each measuring 6.25" x 4.25", HeyDay 6x6 Paper Pad, HeyDay Ephemera Pack, wood veneers, alphabet set of choice. Fold and score all the chipboard pieces in half lengthwise, then stack them on top of each other. To decorate the cover, I cut the patterned paper into 4.75" x 6", stitched around it using my sewing machine before sticking in down on the chipboard using glossy accent. You can use any adhesive you choose, but I thought since this picture keeper is going to be handled a lot, I'd better be safe. Then I decorated the cover with some die cuts and veneer stars.

02

STEP 02

I then moved on to the insides, making out pockets out of patterned papers measuring 4.75" x 3" by stitching them to the chipboard. I added an extra strip of patterned paper on the top of the pocket before stitching them together to add a little bit more stability to each of them. Decorate with more die cuts, washi tape and misted wood veneers.

03

STEP 03

Once the inside is decorated, attach the ribbon on the spine of the picture keeper. Again, I used glossy accent here. While it dries, I help them together with a binder clip.

04

STEP 04

The ribbon will only hold together the first and last chipboard folders, but you will need to attach the middle folder to them. I used a Fabrip cut to 1" wide to hold the folders together.
